AUTUMN 2009

A blast from the intergalactic retro futuristic past!

Like Caractacus Potts, the lovable inventor and creator of Chitty Chitty Bang Bang, Steve Schussler turns ideas, dreams and visions into reality. The creator of Rainforest Café®, T-Rex™ and Yak & Yeti™ at Disney and other colossal entertainment concepts, Schussler has waved his magic wand over an iconic 1951 drive-in restaurant on Highway 7 in St. Louis Park, Minn. The result is Galaxy Drive In™, an “intergalactic retro futuristic” experience for modern day Jetsons, Flintstones and locals who love hamburgers, shakes, Coney dogs, s’mores and more. “Aliens, humans, and all of our four-legged friends welcome,” Schussler says. “And if you mention that Sun Country sent you, we’ll give you a free small soft serve cone.” Now that’s truly scrumptious! —Melinda Nelson
